HOMEWORK FUDGENBOOKS: DATA MIGRATION

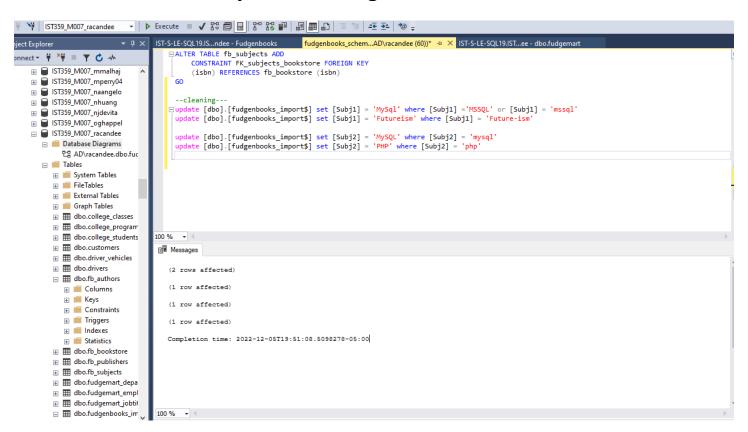

Please turn in just this page. Leave your database intact with your tables populated. If your db does not have data in the target tables you will receive a 0.

Place a results set screen shot of your successfully imported fudgenbook\$ source here:

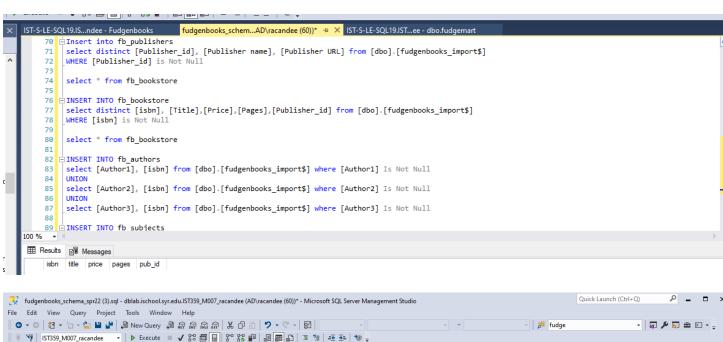

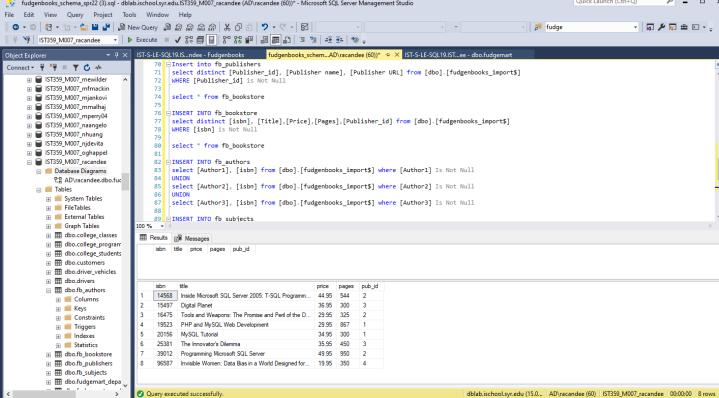

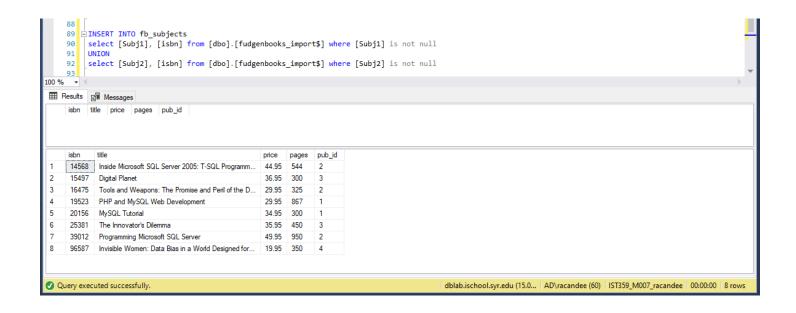

Place a screen shot of your cleansing results and code here:

Place a screen shot of each of your populated tables and code below:

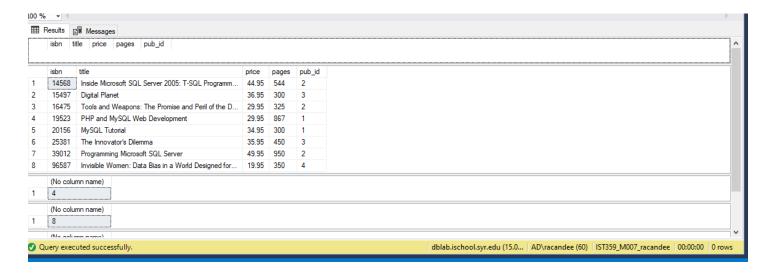

Place screen shots of BOTH your row count results and your full verification results with the code below:

Whole code:

```
if exists(select * from information schema.tables where table name='fb authors')
          drop table fb authors;
  if exists(select * from information_schema.tables where table_name='fb_subjects')
          drop table fb_subjects;
if exists(select * from information_schema.tables where table_name='fb_bookstore')
          drop table fb bookstore;
                 if exists(select * from information schema.tables where table name='fb publishers')
          drop table fb_publishers;
